## MCA Consolidation

### MCA Consolidation FACT SHEET

Our Merchant Cash Advance (MCA) consolidation is a strategic financial solution that combines multiple MCA accounts into a single, more manageable repayment program. Our quick process

simplifies your cash flow, reduces the total number of daily or weekly withdrawals, and often lowers the overall cost of capital for businesses burdened by multiple advances. We can consolidate up to 8 MCA contracts and may reduce repayments by up to 58%.

#### **NOT a MCA Reverse Consolidation**

**Important clarification:** This is a true consolidation of your current MCA balances only. Unlike reverse consolidations which **add 50% in new debt/interest** on top of what you already owe, our program pays off your existing contracts directly with no additional funding and no new debt added to your business.

We understand that businesses managing multiple MCA contracts can be challenging especially with high daily or weekly repayment amounts that impact your cash flow. We have a proven solution that can simplify everything into one new consolidated facility. Even if you currently have MCA contracts in court, we can renegotiate them out into a more suitable repayment structure. **Visit us at:** [www.McDONNELLHOPKINS.com](http://www.McDONNELLHOPKINS.com)
